

Attention parents, guardians, and caregivers,

Occasionally, despite all the information you provide, we may have a question or two about your campers' medication, behavior, routine, etc. Sometimes, campers do become ill at camp and need picked up early and taken home. To this end and *in the best interest of our campers*, it is imperative that the Emergency Contact Person be available 24/7, and that the phone numbers provided are accurate, while your camper is in camp. You are always welcome to list more persons to contact and their phone numbers than we ask for. Thank you. Together, let's give our campers a safe and fun-filled summer they will remember always.
